Dear Hiring Manager,

I would like to apply for the position of furniture maker / cabinet maker in your workshop. I have over 10 years of experience in custom furniture and kitchens, built across Romania, England and Germany, and I am available in the Netherlands from 30 September 2026.

I am currently working as a kitchen fitter for XXXLutz in Karlsruhe, installing complete kitchens in clients' homes to drawing and installation plan — a new client every day, working to German quality and safety standards. Before that I ran my own workshop in Iași for two years, and co-owned a workshop for two and a half years before that, taking projects from the client brief through 3D design and production drawings to installation.

Between 2016 and 2019 I worked in Woking, England, making custom furniture and joinery in the workshop and on site. I worked to British methods and materials, was placed with various companies through agencies, and used English daily — so a Western European working environment and a second language are familiar ground rather than something new.

Practically, I work the full process: SketchUp for design and production drawings, then panel saw, CNC, edge-bander and spindle moulder in the workshop, veneering and finishing, and on-site measuring, scribing and installation. I hold an EU passport, so no work permit is required.

I am looking for a permanent position in a professional workshop in Twente, where quality, precision and teamwork are valued. I would welcome the chance to discuss how my experience fits your team. My portfolio is at alexandruburtea.nl, and I am available for an interview at your convenience — in person or via video call.

Thank you for considering my application.

Kind regards,

Alexandru Burtea
